

FILTER CLEANING AT IT'S BEST

Replacing cylindrical air filters for dust collectors and other sources can be an expensive practice for maintenance professionals.

REDUCE YOUR AIR
FILTER REPLACEMENT
COSTS BY AS MUCH AS
50% OR MORE!!!!

MTS can provide companies with a fully automatic air filter dry cleaning system that uses computer-controlled sequences of compressed air, vacuum, vibration and rotation to completely clean a dirty air filter. MTS can clean any cylindrical air filter ranging from 7" to 32" in height and possessing inside diameters of 3.5" up to 20" in outside diameter.

Unlike other companies, MTS does not use chemicals or liquids during the cleaning process and is the only company in the area that has a mobile unit.

MTS can clean and allow you to reuse air filters found in the following applications:

- Dust / fume collection
- Powder coating booths
- Grinding / blasting booths
- Co-generation
- On & off road equipment
- And more!
